

The background of the poster is a collage of various electronic components. In the top left, there is a yellow printed circuit board (PCB) with several electronic components like capacitors and resistors. In the top right, there are two large electrolytic capacitors with green and purple electrolyte. In the bottom left, there is a blue PCB with two circular components, possibly speakers or sensors, and a green PCB with a microcontroller and various components. In the bottom right, there are several resistors of different colors (blue, yellow) and a yellow LED. The text is centered over this collage.
